SUMMARY

Currently pursuing a specialization in software engineering, I have developed strong technical skills through projects such as building a Simple Shell in C, an Airbnb clone, and PrimeEats, an international delivery platform. Passionate about front-end development, I am proficient in React.js, HTML, and CSS, and I aim to contribute to creating impactful and innovative web applications

EXPERIENCE

, **Airbnb Clone**

Feb 2024 - May 2024

Created a complete end-to-end Airbnb clone to demonstrate proficiency in full-stack development.

Technology Stack: Flask, MySQL, SQLAlchemy, HTML, CSS, and jQuery.

, **PrimeEats**

Jan 2025 - Feb 2025

An international food delivery web app inspired by Glovo, developed as part of a team project. Contributed as a frontend developer, focusing on UI implementation, authentication, and deployment.

Developed key frontend components, including the home page layout and footer with navigation links, ensuring a responsive and user-friendly interface.

Integrated Clerk authentication for secure and seamless user login and registration.

, **React Dashboard**

Sep 2024 - Dec 2024

A dynamic and interactive dashboard application built with React.js, designed for real-time data visualization and a seamless user experience.

Developed a modular and reusable component-based architecture for maintainability and scalability.

Implemented state management using Redux, improving data flow and application performance.

Applied React Hooks to efficiently manage component logic and state updates.

Designed a responsive UI with a focus on usability and accessibility across different screen sizes.

EDUCATION

ALX Software Engineering Program

Software Engineering • *Nov 2024 - Feb 2025*

Completed an intensive 12-month program consisting of a 9-month foundation phase covering C, Python, DevOps, Networking, and Computer Science fundamentals, followed by a 3-month specialization phase focused solely on Frontend Development with React.js, JavaScript, HTML, CSS, and Tailwind CSS. Built real-world projects, including PrimeEats, an international food delivery web app, while applying Agile methodologies, version control (Git/GitHub), and performance optimization. Collaborated with a global community of developers on open-source and team-based projects.

SKILLS

React.js • Redux • TypeScript • JavaScript • HTML • CSS • Tailwind CSS • React Context API • Hooks • Reusable components
